### **DETAILED ACTION**

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on March 08 2004 has been entered.

2. This application is in condition for allowance except for the following formal matters:

A). The amendment filed March 08, 2004 is objected to under 35 U.S.C. 132 because it introduces new matter into the disclosure. 35 U.S.C. 132 states that no amendment shall introduce new matter into the disclosure of the invention. The added material which is not supported by the original disclosure is as follows:

1. The addition of figures 4 and 5.
2. The addition of the brief description for figures 4 and 5 found on page 4 of the specification.
3. The replacement of "Figures 1 through 3" with -- Figures 1 through 5-- found on page 4, line 19 of the specification
4. The addition of the detailed description for figures 4 and 5 found on page 5 of the specification.

The introduction and detailed description of figures 4 and 5 contains new matter due to the fact that the specification, as originally filed, does not provide support for the specific details (components) of a confocal microscope.

Applicant is required to cancel the new matter in the reply to this Office Action.

Art Unit: 2872

The examiner suggests amending figures 2 and 3 to include a graphic drawing symbol, such as a rectangular box, adjacent reference numeral (8) and labeling said rectangular box as a confocal microscope.

B). The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: Proper antecedent basis for the structure and language of claims 34-38.

C). The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the confocal microscope must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

D). Claims 32-46 are objected to because of the following informalities:

In claims 32 and 46, line 2, the language “means to spectrally fan out” should be changed to read --means for spectrally fanning out--.

In claim 32 and 46, line 4 , the language “means to split” should be changed to read --means for splitting--. Appropriate correction is required.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
